29	POWERBOX	CNC G-10				99,90
31	POWERBOX	CNC G-10				99,90

AR is an all around model for any conditions. Wave side shore, on-shore, off-shore; it's the fin that does it all having a wave shape for the smaller sizes and going to more of a freewave shape for the bigger sizes. Speed and early planning are great characteristics of this fin.

GOYA 211 SERIES WAVE

	Size in cm	Box System	Material			Sales Price in €
	20,5	US BOX	CNC G-10			
21	US BOX	CNC G-10				99,90
21,5	US BOX	CNC G-10				99,90
22	US BOX	CNC G-10				99,90
23	US BOX	CNC G-10				99,90

23	POWERBOX	CNC G-10				99,90
24	POWERBOX	CNC G-10				99,90
27	POWERBOX	CNC G-10				104,90
29	POWERBOX	CNC G-10				104,90
31	POWERBOX	CNC G-10				109,90

This fin offers a new concept in fin design developed by MFC and Francisco Goya. The material chosen is G-10. The fins are CNC designed and machined by a high precision milling machine. The profile is an evolution of earlier models with the maximum draft position moved to 38% due to a thickness increase. In fact last year we had to increase the profile thickness by 0.7mm to allow the G-10 to work in the best way for the best performances in wave riding maneuvers, early planing and upwind performance. This particular model has a unique and distinguished concept where in the bigger sizes the fin becomes straighter in the outline and rake and faster in the profile. This fin is ideal for wave and freewave conditions. It is a fast and easy to handle allround wave fin with a lot of surface which helps in onshore conditions.

K-ONE

	Size in cm	Box System	Material			Sales Price in €
	21	US BOX	CNC G-10			
21,5	US BOX	CNC G-10				99,90
22	US BOX	CNC G-10				99,90
23	US BOX	CNC G-10				99,90
24	US BOX	CNC G-10				104,90
27	US BOX	CNC G-10				104,90
22	POWERBOX	CNC G-10				99,90
23	POWERBOX	CNC G-10				99,90
24	POWERBOX	CNC G-10				104,90
27	POWERBOX	CNC G-10				104,90

MFC and Kevin Pritchard, wave world champion, developed this new fin concept also in G-10 construction. The straight outline allows for very early planing and radical upwind ability, but the fin is incredibly maneuverable due to its narrow outline cord. The profile is the fastest, generated by our SL model and adapted to this wave model. Ideal for allround wave conditions can be use also for freewave conditions.

Twin PRO - KT (Keith Teboul Pro Edition)

	Size in cm	Box System	Material	Sales Price in €
	14	US BOX	CNC G-10	
15	US BOX	CNC G-10		129,00

14	SLOT BOX	CNC G-10		129,00
15	SLOT BOX	CNC G-10		129,00
15,5	SLOT BOX	CNC G-10		129,00
16	SLOT BOX	CNC G-10		129,00
16,5	SLOT BOX	CNC G-10		129,00
16	POWERBOX	CNC G-10		134,90
16,5	POWERBOX	CNC G-10		134,90

Twin fins concept, one full year of research and development by MFC together with Kauli Seadi and Keith Teboul, 2 of the most radical wave sailors in the world. This model comes from the outline of the EIGHT, and it has a LEFT and RIGHT fin. In fact it is very important to keep the same fin on the same side to keep the same amount and direction of torsion. The maximum draft of the profile is a 30%, allowing great carving without penalizing the early planing and the upwind performances. Ideal for wave riding, bigger sizes can be used in on-shore conditions.

Twin PRO - LS (Levi Siver Pro Edition)

	Size in cm	Box System	Material	Sales Price in €
	15	US BOX	CNC G-10	
15,5	US BOX	CNC G-10		129,00

17	SLOT BOX	CNC G-10		129,00
18	SLOT BOX	CNC G-10		134,90
19	SLOT BOX	CNC G-10		134,90

Levi Siver and MFC worked together on these new twin fins set. Very wide base and consequently wide cord, very powerful twin fin set, good for heavier sailors. Early planing and maneuverability are the plus for this model. Ideal for side shore /side on conditions.

Twin PRO - KS (Kauli Seadi Pro Edition)

	Size in cm	Box System	Material	Sales Price in €
	16	US BOX	CNC G-10	
17	US BOX	CNC G-10		129,00
16	SLOT BOX	CNC G-10		129,00
17	SLOT BOX	CNC G-10		129,00

Twin fins set developed together with 2 times world champion Kauli Seadi. These fins have a very narrow base, and consequently a narrow cord. It's a new concept to give more speed and stability to the board during your maneuvers. Ideal for side shore/side on conditions.

Twin PRO - VF (Victor Fernandez Pro Edition)

	Size in cm	Box System	Material	Sales Price in €
	16	US BOX	CNC G-10	
17	US BOX	CNC G-10		129,00
16	SLOT BOX	CNC G-10		129,00
17	SLOT BOX	CNC G-10		129,00

This model has been developed together with Victor Fernandez. We wanted to have a TP model which is more allround and very good for on-shore conditions. The rake is very straight compared to the other TP models in our fin line and the draft is slightly moved back to get more speed. The straight rake is also good for early planing and the upwind performance. Ideal for allround wave and on-shore European conditions.

Twin PRO - FG (Goya 211 Series)

	Size in cm	Box System	Material		Sales Price in €
	15	US BOX	CNC G-10		
15,5	US BOX	CNC G-10			129,00
16	US BOX	CNC G-10			129,00

17	US BOX	CNC G-10			129,00
15	SLOT BOX	CNC G-10			129,00
15,5	SLOT BOX	CNC G-10			129,00
16	SLOT BOX	CNC G-10			129,00
16,5	SLOT BOX	CNC G-10			129,00
17	SLOT BOX	CNC G-10			129,00

MFC and Francisco Goya have developed a new TP model for allround sailing. This model is especially designed for everyday sailing in any condition. In fact, the biggest size comes in 17cm for on-shore and lite wind situations. The straighter rake helps with upwind ability and early planing without compromising the maneuverability. In G10, this twin fin set is ideal for allround conditions.

TRI FIN SET

	Size in cm	Box System	Material		Sales Price in €
	15 / 8	US / US	CNC G-10		
15,5 / 8	US / US	CNC G-10			139,90

17 / 8	US BOX/MT	CNC G-10			139,90
17,5 / 8	US BOX/MT	CNC G-10			139,90

MFC and RRD worked very close in the development of this tri fin set-up. This is perfect for beginner/intermediate/advanced wave sailors that want to learn wave sailing or rip in any condition; the board will keep speed and is easy to turn. Tri fins are easy to ride, surfing style. The upwind performance is excellent as well. Available in 3 sizes, this quiver will make your board loose and extreme in waves, especially in European allround conditions.

center/side 400	SLOT/SLOT	CNC G-10			189,90

MFC, in conjunction with Kauli Seadi and Keith Teboul, developed the new QUAD set up for wave boards even approachable for the everyday sailor. The board has drive. The different foil sections on the center and side fins drastically reduce the drag, which make upwind performances superior. This in turn makes riding waves easier for everyone. The board feels looser, yet drives harder at the same time without compromising speed. It makes wave riding more forgiving. The board can be pushed with the front or back foot and the board and fins will continue to hold your style. Tested in different conditions, side shore, side-off, and on shore light winds with amazing results. Our 25 years of fin knowledge together with 2 of the best wave sailors in the world, brought us to the next level of design and performance of the QUAD. We do not choose fins looking at the size/length, but at the surface area we are using.

	center/side 18/8	US BOX/MT	CNC G-10			189,90

A new QUAD set-up developed together with Francisco Goya. This set up compared to our QS sets have an important difference: the center fins increase the size, meanwhile the side fin remain 8cm. With Francisco's style we feel this is what really helps him ride waves the way he wants to. The center fins are designed with a little more tip, giving the option to use smaller side fins. Great early planning and upwind ability are also good for on-shore conditions due to the bigger centers. Great for European conditions.

QUAD FIN SET - QS-211 Series REPLACEMENT (NEW!)

	Size in cm	Box System	Material			Sales Price in €
	center 14	US	CNC G-10			99,95
	center 15	US	CNC G-10			99,95

WAHINE (Girls Edition)

	Size in cm	Box System	Material			Sales Price in €
	18,5	US BOX	CNC G-10			
19	US BOX	CNC G-10				99,90
18,5	POWERBOX	CNC G-10				99,90
19	POWERBOX	CNC G-10				99,90

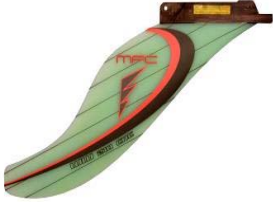

MFC introduces the WAHINE model (Hawaiian word for woman), a windsurfing fin especially designed for women, keeping in mind that the female form is lighter and physically less powerful (generally speaking). MFC created this fin just for women. The fin has amazing maneuverability. It's made in G10, and the shape is developed from the EIGHT (Keith Teboul/Pio Marasco single fin design). Easy planing and great upwind ability, good for overall conditions.

KEIKI (Kids Edition)

	Size in cm	Box System	Material			Sales Price in €
	17,5	US BOX	CNC G-10			
18	US BOX	CNC G-10				99,90
18,5	US BOX	CNC G-10				99,90
19	US BOX	CNC G-10				99,90
17,5	POWERBOX	CNC G-10				99,90
18	POWERBOX	CNC G-10				99,90
18,5	POWERBOX	CNC G-10				99,90
19	POWERBOX	CNC G-10				99,90

This fin is specifically designed for groms, kids, and super light sailors, beginners and experts. This fin is a smaller version of a 2K and is easy to handle and maneuver. It's a perfect tool for the young guns to learn new moves, and ride with fun. Made with G10 material and shaped by a CNC machine, it's the ideal compromise for all around wave/freewave sailing.

WEED WAVE

	Size in cm	Box System	Material			Sales Price in €
	21	US BOX	CNC G-10			
23	US BOX	CNC G-10				112,00
25	US BOX	CNC G-10				119,00
21	POWERBOX	CNC G-10				112,00
23	POWERBOX	CNC G-10				119,00
25	POWERBOX	CNC G-10				129,00

Maneuverable, fast and easy to ride; the rake allows to have the weed sliding easily in any conditions. The profile is the same as our 211 Series fin line, and the material we choose for this model is G-10 CNC foiled. Ideal for any kind of wave conditions.

WEED WAVE SC (Punta S. Carlos Model)

	Size in cm	Box System	Material			Sales Price in €
	21	US BOX	CNC G-10			
22	US BOX	CNC G-10				99,00
23	US BOX	CNC G-10				99,00
24	US BOX	CNC G-10				109,00
25	US BOX	CNC G-10				109,00
21	POWERBOX	CNC G-10				99,00
22	POWERBOX	CNC G-10				99,00
23	POWERBOX	CNC G-10				99,00
24	POWERBOX	CNC G-10				109,00
25	POWERBOX	CNC G-10				109,00

The Wave SC was developed in Punta San Carlos, Baja California. The fin has been designed for wave sailing in conditions where there is seaweed. The initial curve on the leading edge allows the seaweed to slide instead of getting caught on the fin. The shape is very similar to the "Eight", the wave model that was designed together with Keith Teboul. With Weedfins there's always some compromise in design vs performance but the SC has just the right balance. It is ideal for alround wave sailing.

FREESTYLE PRO - NEW!

	Size in cm	Box System	Material			Sales Price in €
	15	US BOX	PREPREG			99,90
	16	US BOX	PREPREG			99,90
	18	US BOX	PREPREG			99,90
	20	US BOX	PREPREG			99,90
	22	US BOX	PREPREG			99,90
	24	US BOX	PREPREG			99,90
	15	POWERBOX	PREPREG			99,90

	13	POWERBOX	CNC G-10			129,00
	14	POWERBOX	CNC G-10			129,00
	15	POWERBOX	CNC G-10			129,00
	12	SLOT BOX	CNC G-10			129,00
	13	SLOT BOX	CNC G-10			129,00
	14	SLOT BOX	CNC G-10			129,00
	15	SLOT BOX	CNC G-10			129,00

The TP-Freestyle has been generated directly from our Freestyle-Pro, fin of choice of the world champions for the last several years. This twin fin was created to help riders with all the new double sliding maneuvers; it is easy to use since the fins are really small. The thinner profile helps to reduce the drag. This concept does not compromise the early planning, or the upwind ability compared to a single fin, it is just the personal choice of the rider. This fin is ideal for freestyle conditions.

Freestyle Weed - NEW!

	Size in cm	Box System	Material			Sales Price in €
	16	US BOX	CNC G-10			99,90
	18	US BOX	CNC G-10			99,90
	20	US BOX	CNC G-10			99,90

	18	POWERBOX	CNC G-10			99,90
	20	POWERBOX	CNC G-10			99,90

Neue Konstruktion, neue Outline - völlig neue Finne: MFC WEED FREESTYLE - entwickelt mit dem gesamten Team. Die Outline hat eine sehr schmale Basis und die Oberfläche ist sehr klein, was dem Board ein optimale Performance für alle Double Moves gibt. Durch die G10 Konstruktion ist die Finne nahezu unzerstörbar und bei Bedarf auch leicht zu nachzuschleifen. Ideal für Freestyle in Seegrassbedingungen!

FREEWAVE - NEW MATERIAL: G10

	Size in cm	Box System	Material	Sales Price in €
	21	US BOX	CNC G-10	99,90
23	US BOX	CNC G-10	99,90

32	POWERBOX	CNC G-10	99,90	
34	POWERBOX	CNC G-10	99,90	
36	POWERBOX	CNC G-10	99,90	

Last season we had a new lay-up for the most sailed freewave fin on the market. We also introduced the VECTRAN, a new prepreg cloth which is strong, light and very responsive to the torsion we needs for our fins. Maneuvers never been easier and top speed, early planing and upwind ability are just unreal on this particular model. Ideal for freewave condition, the 21cm and the 23cm can be also use in wave riding on-shore conditions

K-ONE Freeride

	Size in cm	Box System	Material	Sales Price in €
	30	POWERBOX	CNC G-10	109,00
34	POWERBOX	CNC G-10	109,00	
38	POWERBOX	CNC G-10	112,00	
44	POWERBOX	CNC G-10	118,00	
30	TUTTLEBOX	CNC G-10	109,00	
34	TUTTLEBOX	CNC G-10	109,00	
38	TUTTLEBOX	CNC G-10	112,00	
44	TUTTLEBOX	CNC G-10	118,00	

MFC and Kevin Pritchard developed this freeride fin. Kevin, one of the fastest sailors in the world, was looking for a freeride bullet that can also be maneuvered easily. The "K-One FR" follows the concept of the "K-One Wave" fin because of its narrow cord. The speed, early planing and upwind ability are the best points of this fin. This is the fastest fin you'll ever use..... Ideal for freeride/freewave conditions.

FREERACE - NEW!

44	TUTTLEBOX	CNC G-10	118,00	

This is our new freerace; we have been testing this fin for the last 12 months looking for a great top speed, without losing the maneuverability. We felt that finally we got to this target. This fin could be almost as fast as our racing fins! Before we were never able to get to this target so we are very proud and happy to present this new FREERACE to the MFC line.

LIQUID MOVE

	Size in cm	Box System	Material			Sales Price in €
	36	POWERBOX	CNC G-10			
40	POWERBOX	CNC G-10				109,00
46	POWERBOX	CNC G-10				119,00
50	POWERBOX	CNC G-10				125,00
36	TUTTLEBOX	CNC G-10				109,00
40	TUTTLEBOX	CNC G-10				109,00
46	TUTTLEBOX	CNC G-10				119,00
50	TUTTLEBOX	CNC G-10				125,00

The LIQUID Move derives from the LIQUID PRO. Is a more of a freeride version of the PRO. In fact its rake back and the round tip helps jibing and with the easy handling of your board without loosing speed and in total control. Ideal for Freeride condition.

The LIQUID PRO is the freeride-freerace concept by MFC. The profile is generated by the SL and RC models, with incredible top speed, great planing and still maneuverable as a freewave model. Ideal for freeride and freerace conditions, flat and choppy water, this model is available in power and tuttle base to supply all the board manufactures demand.

46	DEEPTUTTLE	CNC G-10				149,00

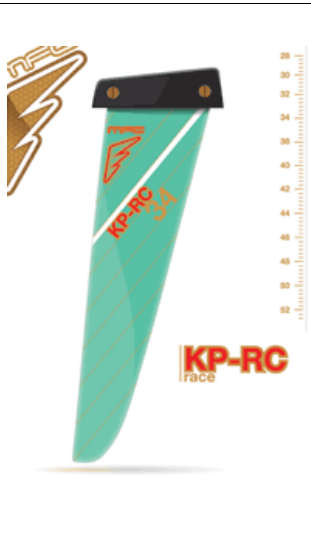

This fin is the exact copy of our SL and RC models designed with Micah Buzianis. The fin is very fast and the upwind performance and the early planing are just incredibly good for this kind of fin. The rake back allows the weed to have easy sliding and no catching at all. EVA added at the "nose" to avoid that weed get caught between nose and board. G-10 CNC foiled, this fin is ideal for freeride, freerace, racing, slalom, and this fin does it all.

52	DEEPTUTTLE	CNC G-10				169,90

The RC2 is MFC's new racing fin that has been designed together with Gonzalo Costa Hoewel and Micah Buzianis. It has thinner foil which gives this fin amazing top speed and great early planing. The RC2 also boasts a different trailing edge that allows the fin to be narrower on the tip. The RC2 is a more competitive fin, very fast and more free then the RC. This fin has been used by our team, and other PWA riders, in the latest competitions. It is ideal for any type of racer!
